

HIGH QUALITY
MADE IN GERMANY

KROLL & ZILLER HAMMER UNION SEALS

For Extreme Pressure Applications.
Engineered for reliability. Built to perform.

Our Hammer Union Seals are designed for high-pressure connections in drilling, testing, and production systems. Made from high-performance FKM (Viton), they combine durability, chemical resistance and precise fit for long-term sealing performance under the toughest operating conditions.

Specifications

- Sizes: 2", 3", 4"
- Figures: 602, 1002, 1502
- Material: FKM (Viton)
- Pressure rating: up to 15,000 psi
- Temperature range: up to 200 °C / 390 °F

Performance

- Reliable sealing under extreme pressure and temperature
- Excellent resistance to hydrocarbons, acids, oils, and solvents
- High resistance to wear, compression set, and aging
- Snap-fit geometry ensures secure and repeatable installation

Applications

Cementing | Fracturing | Acidizing | Testing | Choke & Kill Lines
